Choose "Yes to All"

**The entire Diamond Orchestra will be extracted.**

This library requires the full version of Kontakt, NOT the free player version. To open an instrument, simply open any .nki file. The best way to easily access them is to load them into Kontakt's Quick Load feature so that you can have those instruments readily available each time you open Kontakt. Here is the method to use this feature:

Open Kontakt's Quick Load list: (In this example, I have used Kontakt's Files Browser to navigate to TVEC4 instruments. Then I select all of the

instruments I want from that folder.
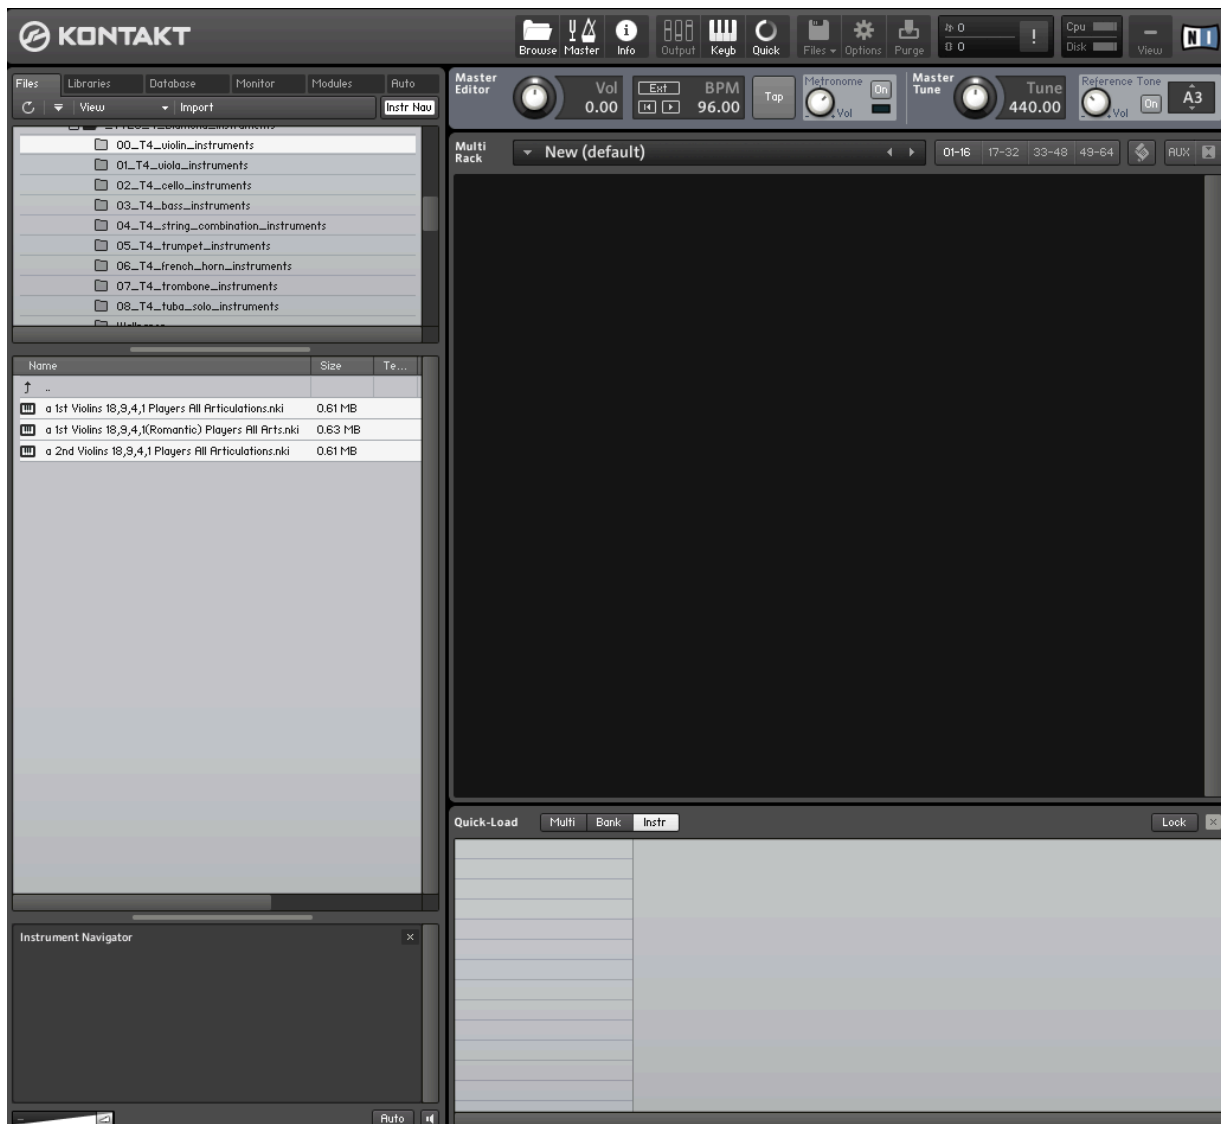

Then, I make sure that I have chosen "Instr" in the Quick Load menu, and then drag the selected folders onto the list:
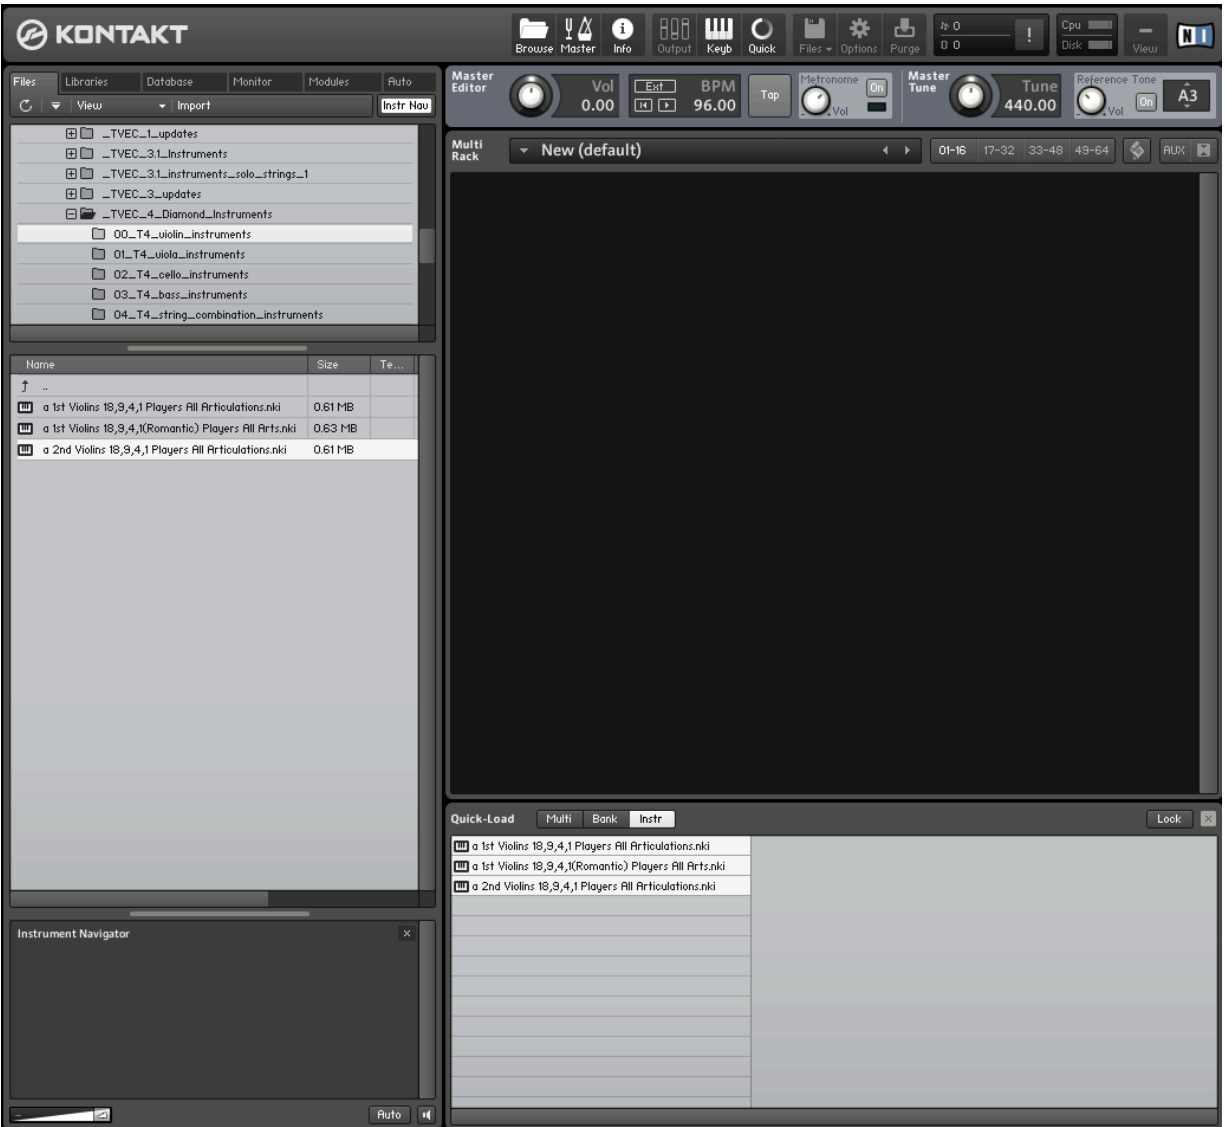

Now these instruments will be available each time I open Kontakt.
